BUSINESS IN MISSISSIPPI.

DUSINESS activities in Mississippi in October showed definite gains over the same month a year ago, the Research Station at Mississippi State College reported with Yazoo City, Canton and Jackson showing the greatest showing a shortage of buildings for housing and business purposes and remarkable building activities.

Business failures for the month were four, amounting to \$24,000, as compared with thirteen, amounting to \$98,000 , for the same month a year ago.

DIVIDENDS AHEAD.

THIS ought to be cheering news for the big boys of business—the biggest flow of dividends in three years is expected to get underway before the end of the year.

Writers on business topics indicate that companies are going to be "liberal" with their profits and pay them out to stockholders, which, as the uninitiated might suspect, is the proper

thing to do with dividends. Stockholders in business concerns generall invest their money in the hope of getting dividends. When the company makes a profit it might be reasonable for the stockholders to expect to get some of it.
